When it is noon at London, on the 20th of March, required those places where the sun will have the same altitude as London. PROBLEM XXXIII. Any place on the globe being given, to find all those places that are at the same distance from it as any other given place. Rule. With a pair of compasses take the extent between both places, describe a circle having the first given place in the centre, and all those in the circumference of the circle, will be the places required. Or, place the quadrant of altitude over both places, so that the part marked 0 may be on the first given place; mark the degree over the other place, and describe a circle with the quadrant. When the quadrant is not long enough, extend a thread between the two...
