Snoopy Loop

By Lambert M. Surhone

Betascript Publishing. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. A Snoopy loop is a term used in the British caving and cave diving community to describe a heavy duty elastic band made from a slice of a car inner tube. They have a wide variety of uses from sealing cuffs of oversuits and collars of boots against the ingress of water, to holding kneepads and elbow pads in place, to securing dive lines to small rocks. When they get lost they are recognizable as common form of litter. They can also come in handy in the case of an accident for holding injured joints very tightly in place. The practice of using Snoopy Loops is believed to have originated in Greece and was spotted by Cave Diving Group members in the seventies. The practice was then propagated in Yorkshire Dales. 92 pp. Englisch.
